Dear Mrs. Jeanky,

I am writing to express my interest in the web developer position at your company, as advertised on your job posting. As a motivated and dedicated student pursuing a Bachelor of Science in Information Technology with a focus on Web Development, I am excited about the opportunity to contribute my skills and knowledge to your team.

Throughout my academic journey, I have gained valuable experience in front-end and back-end web development technologies, including HTML, CSS, JavaScript, Angular, and Node.js. I also have a fair share of experience in graphic design tools during my internship, which allowed me to create visually-appealing and effective designs. This experience taught me the importance of aesthetics and usability in web development, skills that I am eager to bring to the development process to your company.

What excites me most about this position is the chance to learn and adapt to new technologies. I am eager to stay updated with industry trends and embrace new challenges in web development. I am confident that my ability to learn quickly and my passion for continuous improvement make me a strong candidate for this role.

Enclosed is my resume, which further outlines my experiences and qualifications. I would appreciate the opportunity to discuss how my skills and enthusiasm for learning can benefit your esteemed organization.

Regards,

Kristoffer Lacson
